

resicon anchor studs steel

Description :

Chisel ended steel anchor studs in carbon steel and A4-316 grade stainless steel for maximum corrosion protection, both supplied with external hex drive complete with hex nut and plain washer for use with any of our injection systems and glass capsules in masonry and concrete.

1nr external drive adaptor included per box.

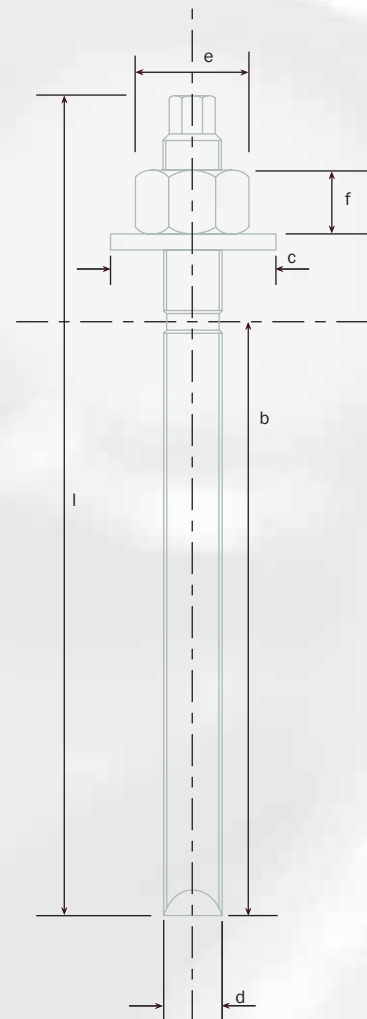

Material : Grade 5.8 carbon steel  
 Finish : Bright zinc plated and/or yellow passivated  
 Tensile strength (nom) : 500N/mm<sup>2</sup>

Material : Grade 316-A4 stainless steel  
 Finish : Self colour  
 Tensile strength (nom) : 800N/mm<sup>2</sup>

Also available in special grade HCR 1.4529 stainless steel to order only.
